

TRUE NORTH STRATEGIC SERVICES

RAPID DEPLOYMENT | TRANSITION EXECUTION | MISSION CONTINUITY

Deploy capability faster. Maintain mission continuity.

Federal Capability Statement

UEI: DADKLRAW9UZ8

CAGE: 18RK1

Colorado Springs, CO

truenorthss.com

Rapid transition execution for federal capability delivery, contract stand-up, operational readiness, and mission continuity.

TNSS helps federal organizations move technology, services, contracts, and operating models from award, decision, or transition trigger to operational use—fast, controlled, and without disrupting mission operations. We integrate transition planning, stakeholder coordination, communications, workforce readiness, training, cutover, and stabilization as one execution layer so program, contracting, vendor, and mission teams stay aligned through delivery.

○ PLAN Transition strategy, sequencing, dependencies, risks, readiness criteria, and go/no-go support.	◇ COORDINATE Governance, vendor and stakeholder alignment, acquisition and program decision-support materials, executive communications, and issue resolution.	△ DEPLOY Readiness, training, cutover coordination, command-center support, and operational handoff.	□ STABILIZE Hypercare, adoption feedback, performance validation, risk remediation, and steady-state transition.

TNSS Leadership Experience

200+ Rapid federal deployment transitions	4M+ Users across supported service environments	5 Days 1,200-seat FEMA hurricane-support deployment	93 Days Navy network-modernization MVP go-live	14-Day Average VA service onboarding
--	--	--	---	---

Experience shown reflects prior work of TNSS leadership and is not represented as TNSS corporate past performance or agency endorsement.

Execution First Accountable delivery support, not advisory-only recommendations.	Built for Speed Experienced in compressed federal deployment timelines.	Integrated Control Schedule, risk, communications, training, cutover, and stabilization managed together.	Senior Agility Hands-on support without unnecessary staffing layers.
---	--	--	---

Delivery Model ASSESS → ALIGN → EXECUTE → STABILIZE			
ASSESS Define scope, impacts, risks, stakeholders, and readiness gaps.	ALIGN Establish governance, decision cadence, communications, and success criteria.	EXECUTE Drive readiness, training, cutover, issue resolution, and handoff.	STABILIZE Support hypercare, validate performance, and transition to steady state.

Representative Federal Experience

Department of the Navy Enterprise transition leadership supporting mission users, service environments, and continuity at scale, including Navy network modernization and emerging technology implementation.	FEMA 1,200-seat contact-center deployment completed in five days to support urgent operational demand.	GSA Service desk transition support delivered to go-live in fewer than 100 days, supporting readiness, operational alignment, and continuity through cutover.	Department of Veterans Affairs VA Service Desk onboarding timelines averaged 14 days and completed in fewer than 30 days for large-scale service transition.
---	--	---	--

Federal environments supported by TNSS leadership: Navy, Department of State, GSA, Census Bureau, VA, and Air Force.

ENGAGEMENT MODELS

How TNSS Engages

Transition Execution Packages FFP support for defined transitions, deployment waves, cutovers, or implementation portfolios.	Project Recovery Sprints Focused re-baselining, risk reduction, issue triage, leadership alignment, and stabilization.	Labor-Hour Surge Support Senior transition leadership and hands-on execution support for urgent or evolving requirements.
